Premium

DESIGNED FOR HARSH MARINE ENVIRONMENTS

Toshiba's Marine Duty motor series is created for use in the marine industry and is designed using all the best features of Toshiba's EQPIII-840 and EQPIII-841 NEMA Premium® motors. This motor series is built to withstand the most extreme conditions and designed to meet the industry's ever-increasing need for product reliability and improved energy conservation. This motor offers some of the highest efficiency and torque ratings while producing some of the lowest vibration ratings in the industry.

- All EQPIII-840 and EQPIII-841 motors now carry the Marine Duty and IEEE 45 on the standard nameplate.
- Toshiba is certified by ABS to carry the Manufacturers Quality Assurance Assessment Program certification on 840 and 841 motors, 1 to 350 HP designs.
- Type approval certificates are available from the ABS web site: www.eagle.org/eagleExternalPortalWEB/.
- Stock products can be re-nameplated for ABS type approval.
- Essential services motors are available as custom production motors.
- Special applications and specific unit certifications are also available.*

*Contact the Toshiba Low Voltage Motor Applications Group for process and pricing information on ABS nameplating and unit certification.
